DOCUMENT-IDENTIFIER: US 20020190438 A1

TITLE: Process and kit for casting sand.

Detail Description Paragraph:

[0030] The sand casting may be carved before the heating step by placing a cutting mold into the resin/sand mixture. For defined shapes, a cookie cutter can be placed in the pre-microwaved, resin/sand mixture and then removed before heating so as to leave the outline of the desired shape in the resin/sand mixture.

Detail Description Paragraph:

[0038] The process for casting sand may be easily facilitated by providing the components for the process in a ready to use kit. As shown in FIG. 2, a preferred embodiment of the kit 1 includes a package of sand 5, a container of non-toxic binding resin 10, and a microwavable mold 15, together with instructions for preparing the sand casting. Optionally, there may be included carving tools, such as cookie-type cutters 25, and a carving knife 30, and decorating tools, such as paints 35, a paint bush 40, and glitter glue 45.
